### **DETAILED ACTION**

1. This action is responsive to communications: Pre-Amendment, filed on 6/5/2000.  
This action is non-final.
2. Claims 1-64 are pending in this application. Claims 1, 16, 17, 32, 33, 48, 49 and 64 are independent claims.
3. The present title of the invention is "Texture mapping method and apparatus for computer implemented graphical image processing".

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 16 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 16 is a method claim, which is considered a process. A process under U.S.C. 101 must be tied to another statutory class (such as a particular apparatus) or transform underlying subject matter (such as an article or materials) to a different state or thing.

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

As per claims 49-64, "a computer program product" and "a computer usable medium" do not have support from the specification.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 49-64 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claims 49-64, since "a computer program product" and "a computer usable medium" are not described in specification, it is not clear what they are.

***Allowable Subject Matter***

Claims 1-15 and 17-48 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

As per claim 1, the closest prior art by Hannah et al (5,548,709) or Devic et al (6,181,347) does not explicitly disclose "selecting a pair of complementary coefficients from a table, stored in the memory, of predetermined complementary coefficients according to the fractional portion of the first texture coordinate of the pixel".

Claims 17, 32, 33 and 48 are allowable for similar reasons.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
